Program Offered

Class A Commercial Truck Driver Training/ 168 clock hours/ Full Time

The program is designed to produce a safe and efficient commercial truck driver. Upon the successful completion of the program, the student will qualify for entry-level employment. Employers will still require additional supervised driving and training before being able to safely operate a tractor-trailer as a solo driver for the employer.

This program is designed to take your average everyday driver and teach them the rules and regulations to become a commercial truck driver. This program has many different educational pieces that teach the applicant the general knowledge of a commercial vehicle. The student will get to learn via classroom as well as hands on with the equipment. Once the student feels comfortable, we move to the basic skills procedures. This process teaches the student how to safely operate the vehicle in a controlled backing state. We will instruct the student how to efficiently back the tractor and trailer in many different maneuvers. The next step is to train the student how to safely maneuver the tractor trailer out on the roadway. This process is very thorough so that the students begins to feel comfortable with his or herself behind the wheel. The student must learn at this point the importance of safe and cautious driving techniques. This is what will make the program stand out in my opinion because of the safety precautions I have learned over the years from experience in the commercial safety field. I want to make sure that every student has the education to have a successful and safe career in the commercial world.
